

Hurdles:

- getting approval for app to use school email
- designing app
- getting people to download
- having a way to prove the item is truly theirs

Jacob Robinson

Marketed:

- lost and found app
- can see the lost items and the location

Jacob Robinson

Features:

- takes pictures of lost item
- user must include location of item
- user must include date and time found
- include comment section on pictures
- connects to school email so if someone mentions their email in the comments they will receive an email

Jacob Robinson

Technologies:

- runs on an app
- can run on android and apple
- needs access to camera
- needs internet access

Jacob Robinson

Future:

- Could allow seniors in computer engineering/science to monitor app to make sure running properly
- USC can post ads on events the school is having
- could have top or side part of app be able to run ads for money

Jacob Robinson

Use case:

- USC runs app
- students use app
- free to use
- faculty and students can post

Jacob Robinson
